

ASSIGNMENT 2

Date	24 September 2022
Team ID	PNT2022TMID21342
Name	Lingeshwaran K
Project Name	Project – Smart Farmer-IoT Enabled Smart Farming Application
Maximum Marks	2 Marks

PROGRAM

```
import random

while(True):

    a=random.randint(10,100)

    b=random.randint(10,100)

    if(a>35 and b>60):

print("High Temperature and Humidity of:",a,b,"%","Alarm is ON")

    elif(a<35 and b<60):

print("High Temperature and Humidity of:",a,b,"%","Alarm is OFF")

    break
```

The screenshot displays a Python IDE with two windows. The left window shows the source code for a program that generates random temperature and humidity values and prints an alarm status based on specific conditions. The right window shows the output of the program, which includes a restart message and several lines of generated data.

```
